

## DROID PUZZLE

GENERAL ORGANA IS PREPARING A RECONNAISSANCE MISSION AGAINST THE FIRST ORDER. FOR THE PREPARATION, SHE PASSED CERTAIN PROCESSES AND TASKS OFF TO HER SECOND IN COMMAND, WHO IN TURN PASSED IT OFF TO SOME DROIDS. HOWEVER, THE GENERAL'S SECOND IN COMMAND DIED IN A BATTLE, AND THE ONLY INFORMATION REGARDING THE IDENTITIES OF THE ROBOTS WERE FOUND IN AN ENCRYPTED LOG. YOU HAVE BEEN ASSIGNED TO FIND OUT WHICH DROID WAS APPOINTED TO WHICH TASK, THE NUMBER OF TASKS COMPLETE, AND THEIR COLORS.

The table on the next page will need to be filled out in order to answer all the questions. The encrypted log will provide hints. To crack the cipher, seize it and look for patterns and items that stand out. Once cracked, use the logic chart to deduce the answers. For example, if Han Solo made the Kessel Run in fewer parsecs than the ship CK-0002, we would know the following: Han Solo did not fly ship CK-0002, CK-0002 did not fly in the fewest parsecs, and Han Solo did not fly in the most parsecs. On the logic chart, those options can be crossed out. If a statement said "Jamba Hoota's red ship came in second" we then know that no other pilot, including Han Solo, came in second, and that Han Solo's ship is not red.

**GOOD LUCK, AND MAY THE FORCE BE WITH YOU...**
